SECURITY
ADVISORS

01

THREATS

Threat is a potential hazard or adverse action that could exploit, destroy or steal data from a vulnerability in the system or assets and affect the **confidentiality, integrity** or availability of the **assets.**

LMS SECURITY ADVISORS

02

VULNERABILITY

A vulnerability is a **flaw, weakness** or shortcoming in a system, infrastructure, database, process or set of controls that can be **exploited.**

LMS SECURITY ADVISORS

03

RISK

Risk is the likelihood or the negative impact of a certain event happening. The **probability** of threat and the **consequences** of the vulnerability are **combined** to form risk.
